

IRVIN STEEL  
A division of Irvin International, Inc.

## Our Family of Fiberglass Products for Outdoor

### Fiberglass Billboards

A first in the industry, our patent-pending fiberglass panel-less billboard frame, **StormTamer**, offers a multitude of benefits to the outdoor industry. It helps to drastically reduce weight on the board and is simple to install. The beams arrive partially fabricated and the EZ Install Kit means no runs to the hardware store for anything.

- › 75% lighter than steel
- › Rust resistant
- › Non-conductive
- › No welding
- › Easy to fabricate
- › 64 PSF/150 mph wind load

### Fiberglass Catwalks

Another first in the industry, our patent-pending fiberglass catwalk, **FiberCAT**, offers many of the same benefits as our fiberglass panel-less frame. No rusting. No rotting. Plus, they can be built on site with just a mallet and drill. So light weight, the catwalks can be hand-lifted and placed directly onto the arms of low boards.

- › 75% lighter than steel
- › Rust resistant
- › Non-conductive
- › No welding
- › Easy to fabricate
- › 500 lb. concentrated load

### Fiberglass Skirting

This alternative to metal and wood billboard skirting offers many benefits. Our fiberglass skirting, **FiberSkirt**, will not rot or rust and never needs to be painted. And it's lighter than metal or wood, making it easy to handle and more economical to ship.

- › Easy color matching
- › Various corrugations and textured finishes
- › Rust and rot resistant
- › Non-conductive
- › Never needs paint
- › Lightweight
